

# Engineering Club

...

# Our Mission

- The purpose of this club is to engage students as well as give students an exposure to the outside world. The skills that will be attained from this club are designed to help the students in the future.
- The projects will be directed by both group members. Each project will have a task to accomplish and students will try to come up with their own ways of completing the task. This way, it allows students to challenge themselves and think.

# Upcoming Projects

- Week One: Fidget Spinners
- Week Two: Goldberg Machine
- Week Three: Goldberg Machine Continued
